

I fully support NJ's, as well as other states "No Not Call Laws" which which enjoin telemarketers from ever calling without regard to time limits or any other exemption or loophole. I am against any weakening of NJ's law. My family's quality of life significantly improved once we registered our landline phone. Prior to registering we never, I repeat, never picked up the phone without screening all calls. Now, our telephone no longer sparks uncertainty when it rings. Please do not overturn nor weaken a law of the people and for the people.
